

***Mini Analogue  
Collection***

## Introduction

I'm very happy to release BPB Mini Analogue Collection, a free sample pack featuring the sounds from several analogue synthesizers I used to own. Considering that not a lot of people own Kontakt 5, I've also included SFZ patches this time!

## Contents

I wish I could have included more stuff in this pack, but most of these synths ended up in the ads more than a year ago, and I wasn't smart enough to sample everything back then. Always sample your synths! That way you can keep their sounds even if they break or need to be sold.

Anyway, BPB Mini Analogue Collection contains samples from the following 5 instruments (4 polyphonic synthesizers and 1 quirky drum synth made in USSR):

- Korg Delta
- Korg Poly-61m
- Korg Poly-800
- Solton Project-100
- Lell UDS

And here's what you'll find inside the pack:

- 254 WAV samples (16-bit quality)
- 9 multisampled instrument patches (SFZ + Kontakt 5)
- 2 Kontakt 5 Multi Racks
- 96MB download size
- 118MB size on disk

Hope you'll have fun with these! They're not the most fantastic samples in the world, but some of the patches are very nice (I like them all a lot, actually). Some sound very cheap and Lo-Fi (a patch I made on Poly-800 called VHS Brass, for example), but these quirky sounds are great for getting that worn out cassette tape kind of vibe.

## License

All the sounds in this sample pack are provided **free of charge** and are 100% royalty free. Feel free to use them in any of your music projects, including commercial ones. The sounds, including modified versions of the sounds, may not be redistributed, nor included in other sample packs. Please do not share direct download links, but link to the **original BPB article** instead. Thanks!
